

It has come to my families attention that your organization is trying to revamp the Indiana Telephone Privacy law protections. As a taxpayer and registered voter, I urge you to NOT change the law. Since signing up, my family has now been able to eat meals together without interruption and I can give my three children to sleep without having the telephone wake them up, which NEVER occuured until I signed up. This also allows me to contact companies that I want to pursue without pressure or inconvenience.
